DETAILED ACTION

The Examiner in charge of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to F. Pierre VanderVegt, Ph.D. in Art Unit 1644.

This application is a continuation of U.S. Application Serial Number 09/258,240.

Claims 1-9 have been canceled.

Claims 10-20 are currently pending and are the subject of examination in the present Office Action.

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 2, 2006 has been entered.

In view of Applicant's amendment filed June 2, 2006 and the various declarations of inventors Kuijpers, van Hagen and Baarsma, **no outstanding ground of rejection is maintained.**

In view of Applicant's amendment filed June 2, 2006, the following new ground of rejection has been necessitated.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 10-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. This is a NEW MATTER rejection.

Art Unit: 1644

Applicant has amended claims 10 and 14 to recite the treatment of "cystoid macular edema." While the specification discloses that cystoid macular edema is "the most important cause for visual impairment in uveitis" on page 1 at lines 9-15 for example, the specification does not recite that species of macular edema as being of particular note for treatment. The specification discloses only the treatment of conditions that fall under "category (1), (2) and (3)" on page 3 at lines 29-32 for example. However, none of those categories specifically recite "cystoid" macular edema. "Category (1)" recites the broader genus term "macular edema," and recitation in the claims of the species "cystoid macular edema" may be obvious. Applicant is reminded that obviousness is not the standard for the addition new limitations to the disclosure as filed. Entitlement to a filing date does not extend to subject matter that is not disclosed, but would be obvious over what is expressly disclosed. Lockwood v. American Airlines Inc., 41 USPQ2d 1961 (Fed. Cir. 1977).

Accordingly, while treatment of the species "cystoid macular edema" would be encompassed by claims to the treatment of the genus "macular edema," specific recitation of "cystoid macular edema" in the claims constitutes new matter and must be removed.

Conclusion

3. No claim is allowed.
